

KENNETH ISAAC G. BERNARDINO

Software Engineer | Full-Stack Development | Application Support | Cyber Security & AI

Kogarah, Sydney NSW 2217 | +61 452 202 548 | kent.bernardino@gmail.com | linkedin.com/in/kenbernardino | kenbernardino.com

PROFESSIONAL SUMMARY

Software Engineer with 8+ years building and supporting enterprise applications and business systems for global organisations, spanning application development, production support, system analysis, testing, and technical documentation across Agile delivery environments. Completed a Master of Information Technology (Cyber Security) in Sydney (2023–2025) while working in a supervisory role, and has since built hands-on full-stack JavaScript skills (see Portfolio) through IBM, Vanderbilt University, and SAP-affiliated Coursera programs. Looking for a software engineering, application support, or IT-related role that combines this delivery experience with current technical training.

CORE SKILLS

Enterprise Systems:	Business Application Development, Document/Workflow Automation, Business Rules Configuration, System Integration
Web Development:	JavaScript, React, Node.js, PHP, HTML, CSS, Bootstrap, MySQL, SQL, Git & GitHub
Enterprise & Consulting:	SAP Solution Design & Implementation, Requirements Gathering, Stakeholder Interviewing, Client Analysis
Cloud & Tools:	Cloud-Based Applications, Agile
AI Skills:	ChatGPT and Generative AI Tools, Prompt Engineering, AI-Assisted Coding and Data Analysis
Cyber Security:	Network & Cloud Security Basics, Risk Assessment, Incident Response
Support & Delivery:	Application Support, Incident Management, ServiceNow, Jira

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Feb 2022 – Dec 2022

QBE Group Shared Services Centre – Philippines

- Led delivery of BAU and Qnect insurance correspondence platforms, building dynamic templates and business-rule-driven logic for automated, personalised document generation at scale.
- Implemented workflow optimisation and performance improvements, reducing turnaround time by approximately 20–30%.
- Managed complex variable data processing supporting high-volume, personalised outputs across multiple insurance correspondence streams.
- Collaborated with Business Analysts, QA, UAT, and deployment teams, and participated in Agile Scrum ceremonies to support successful, continuous production releases.
- Performed troubleshooting, root cause analysis, and production support for enterprise systems.

Technology Consultant II

Aug 2019 – Feb 2022

DXC Technology Philippines

- Acted as the client-facing technical point of contact for enterprise accounts, conducting system analysis, configuration, and platform implementation to meet business requirements.
- Handled incident management and service requests within SLA targets, supporting enterprise applications used across multiple business units.
- Supported release management, deployment validation, and SDLC delivery across Agile environments, contributing to stable production releases and reduced post-deployment defects.
- Developed technical documentation and knowledge base materials, and collaborated with cross-functional stakeholders to resolve production incidents and deliver continuous service improvements.
- Ensured compliance with IT governance, security policies, and organisational standards.

Systems Analyst

Oct 2018 – Jul 2019

Fuji Xerox Singapore Pte Ltd

- Supported output generation systems for the Housing Development Board (HDB) Singapore, producing high-volume, nationwide correspondence and document outputs.
- Designed and implemented automated document workflows, performing system debugging, integration testing, and validation to ensure accurate outputs.
- Improved quality assurance and compliance controls within operational workflows, and prepared technical specifications and documentation for system maintenance and knowledge transfer.

Programmer Analyst

Aug 2014 – Oct 2018

DXC Technology Philippines

- Developed and maintained enterprise applications supporting business operations, and built automated batch processes and workflow automation to improve system efficiency.
- Implemented bug fixes, enhancements, and change requests across multiple releases, using JIRA for task tracking and Agile project management.
- Produced technical documentation and deployment support materials, and provided production support and troubleshooting to maintain system availability.

Application Support & Automation

Earlier Career (Australian Clients)

- Built and maintained variable-data template workflows for Australian clients, translating client-supplied business rules into automated, data-driven document logic.
- Tested and debugged output batches against client specifications, tracking and resolving defects to ensure accurate, compliant print and digital deliverables ahead of production deadlines.

PROJECTS & PORTFOLIO

Wellness Booking Web Application — School Project (PHP/MySQL)

- Built a wellness-booking web application (PHP, MySQL) covering account registration, secure login, and a booking workflow. github.com/kbernardino20/GlowInWellness

GiftLink — Full-Stack Cloud Application Capstone (React / Node.js / MongoDB)

- Built a full-stack community gift-sharing platform for the IBM Full-Stack JavaScript Developer capstone — React frontend, Node.js/Express REST API, MongoDB, JWT authentication, a Python Flask sentiment-analysis microservice, and CI via GitHub Actions, deployed on Vercel. github.com/kbernardino20/fullstack-capstone-project

Portfolio: kenbernardino.com

ADDITIONAL EXPERIENCE

Customer Service & Operations Supervisor — Ippudo Australia Pty Ltd (while completing postgraduate studies)

Apr 2023 – May 2026

- Supported daily operations in a fast-paced, high-volume environment while completing a Master's degree full-time, providing shift leadership and coordinating team workflow during peak periods.
- Applied problem-solving and process-focused thinking to operational challenges, demonstrating the adaptability and time management needed to balance full-time work with postgraduate study.

EDUCATION

Master of Information Technology (Cyber Security Specialisation)

King's Own Institute, Sydney, Australia | 2023 – 2025

CERTIFICATIONS

SAP Technology Consultant — Professional Certificate (7 courses)

SAP | Jul 2026

- Gained consulting skills including requirements gathering, stakeholder interviewing, client communication, and solution design.

Verify: <https://coursera.org/verify/professional-cert/H905I1UUWIO4>

IBM Full-Stack JavaScript Developer — Professional Certificate (12 courses)

IBM Skills Network | Jul 2026

- Built web pages, interactive interfaces, and back-end servers/APIs using HTML, CSS, JavaScript, React, Node.js, Express, and Git/GitHub.

Verify: <https://coursera.org/verify/professional-cert/GWIHQZZP7EW>

Generative AI for Software Developers — Specialization (3 courses)

IBM Skills Network | Jul 2026

- Learned what generative AI is and how it's used in real-world software projects, and practised writing effective prompts to get useful results from AI tools.

Verify: <https://coursera.org/verify/specialization/CFRMTB98331Y>

Generative AI Data Analyst — Specialization (4 courses)

Vanderbilt University | Jun 2026

- Used ChatGPT and other AI tools to explore and analyse data (including SQL and Excel-style spreadsheets), and practised writing clear prompts to turn raw data into insights and easy-to-understand stories.
